We Select for Traits Important to Ranchers!

Feet, udders, easy-calving, disposition, high weaning weights and marbling. All our bulls have less than 100 pound birth-weights and are black or solid red in colour.

We have sold thousands of bulls and heifers to reputation herds

GOALS OF OUR COMPOSITE

Hybrid Vigour

It is free and gives you 25% more. The simplest and cheapest way is to use composite bulls. The benefit of hybrid vigour comes through higher pregnancy rates, survival rates and weaning weights. Plus the crossbred cow lives 3 years longer.

Early and Sustained Growth with Low Birth Weight

We all get paid by the pound, even at the grocery counter. The faster we get it there, the better for us all. SHOR composites uses Curve Bender Bulls, which = low BW with high growth. High growth = high weaning weight and future growth. This with acceptable birth weights.

Beef Quality

Our customer - your customer - is the person who uses their hard earned money to buy beef. We must guarantee that it is a good eating experience. That is why Shoreline puts the focus on beef with high marbling and tenderness. The sires we use have that, or we don't use them.

Colour

Our bulls are black or cherry red. Consistent colour with the highest level of Hybrid Vigour.

We weigh our calves at 150 days to identify rapid, early growth.

Now is the best time to select your bull

That way you will see what your calves will look like. Our bulls are produced through 25 years of selection, managed and tested

Guy & Susan Johnson

in range conditions.

We are your hybrid vigour specialists.
